55 Broadway,
Cambridge, MA 02142

ATT: John Kudarauskas

Damages we are dealing with in the storage bins.

We asked that the plug be removed from the pump on the river to allow drainage for the winter. the pump was to stay in place.

- the plug was removed and lost.
- the pump was removed from the river
- all pvc connectors to the pump were destroyed
- the inlet 2" galvanized pipe was cut off with a saw
- the cord to run the pump was cut off with side cutters
- the chassis holding the pump is separated from the pump
- the water in the pump is frozen
- the plate holding the pump on the concrete pad was yanked off the 2 x 4 footing
- photo #12

One 54" x 26 1/2" thermal pane windows was broken in the storage unit downtown.
Photo # 6F

One glass display shelf from the wrought iron black cart is broken. The u shaped handle bar used to push the cart is missing. Photo # 10

One blue cart having for wheels and measuring 21" x 48" which has not and will not be accounted for the value is \$239.00 No cart no photo!

The blue wood cook stove has a cover plate (blue and white enamel) missing from the front on the stove. Photo # 2

There are 3 planter racks not accounted for. No racks no photo!

There are 62 rail missing from the racks which were returned. Photo # 14

The horizontal frame rails on one rack are bent and the attachment plates are separated from the vertical chassis. Photo # 14

There are two gray 100' long one inch diameter hoses which were used by Marco when they first arrived to "DE CON" items on the property
